## SUMMARY

BCA student and aspiring Full-Stack Developer with expertise in the MERN stack. Successfully built **JoeVibe**, an e-commerce platform, showcasing skills in API integration, responsive design, and database management. Contributed to other impactful projects like **Roofly** (real estate platform), demonstrating a passion for solving real-world problems through innovative web solutions. Excited to combine technical expertise and creativity to deliver user-focused applications and grow in the field of software engineering.

## SKILLS

**Languages :** HTML5 | CSS3 | JavaScript | TypeScript | Java

**Tools :** React.Js | Node.Js | Vue.Js | GitHub | Git | Bootstrap | Tailwind | JavaScript ES6 | JQuery | Express.Js | Responsive Web | MySQL | WireFraming | Figma | Adobe Xd | MongoDB

## EDUCATION

Bachelor of Computer Applications (BCA)

Maharishi Markandeshwar University, Ambala, Haryana

[2022-2025]

( Graduate on June 2025)

My coursework includes Computer Architecture, DSA, Networking, Java, Python, Mobile App Development, and Statistics, with hands-on experience in software development and problem-solving through projects and coding challenges.

MERN Stack Development Bootcamp

CoGrammar Bootcamp, UK remote

[2023-2024]

Completed an intensive MERN Stack Bootcamp, gaining experience in MongoDB, Express.js, React, Node.js, API development, database management, and building scalable web applications.

Front End Development Certification

edX Bootcamp, Online

[2023-2024]

Completed a Bootcamp with edX, focusing on HTML, CSS, JavaScript, React and responsive design. Gained hands-on experience in building user-friendly web applications and optimizing UI/UX for better user experiences.

## RELEVANT EXPERIENCE

Frontend Developer

Mirage Media Group, Nairobi Kenya

[2023-2024]

Remote

Collaborated with the design team to improve UI/UX, developed responsive web pages using React, HTML, CSS, and JavaScript, and assisted in API integration and website optimization for faster load times and enhanced functionality.

Virtual Assistant

Freelance

[2023-2024]

Remote

Provided Assistance support, managed client communications, conducted research, and organized digital files to ensure smooth workflow and efficient access to information.

## PROJECTS

### Roofly

Developer

Real estate platform built with the MERN stack, featuring dynamic listings and property management tools. I gained experience in full-stack development, API integration, and optimization. Collaborating with a team, I enhance my communication, problem-solving, and project management skills while delivering a seamless user experience.

### JoeVibe

Developer

*JoeVibe* is an ecommerce platform built with React, featuring dynamic product listings and secure checkout. I gained experience in frontend development, API integration, and performance optimization, improving user engagement and conversions.

### HaveWord

Developer

Have A Word is a dictionary and translation web application with quiz functionality. It allows users to search for words, view definitions, translations, and example sentences.
